

## Guide to Stock and Scrip Research Materials

### Michigan Technological University Archives & Copper Country Historical Collections

Assembled by  
Perry Mesloh  
Fall 2023

Note: The mining name code scheme used below was adopted from the work of Lee DeGood, researcher and author of *Michigan Copper Mining Stocks and Bonds* (2011). The guide is organized by collection, box number, folder number, then name code, with numbers following indicating the number of instances of individual company stock. Non-mining stock listed **does not** have a standardized DeGood Code.
